

I am writing about preserving the FM translators rather than replacing with LPFM (low power FM). I understand this change could prevent my community from continuing to receive K-Love radio. I have listened to K-Love for at least 3 years in my car and at my work everyday. I am an electrologist which means I treat one client at a time in my office. I and many of my clients enjoy the wholesome, positive environment of listening to K-Love while they are being treated. I appreciate the Christian music, national news updates and encouraging messages from K-Love. This is a service that is greatly needed and appreciated that does not have a comparable replacement. Please continue to allow this family- friendly program to meet the needs of myself, my clients and my community. Thank You.
